Your flying camera

Introducing Breeze, the flying camera designed with you in mind. Both convenient and compact, Breeze is controlled by your iOS or Android device with the Breeze Cam app and weighs just under 1 pound. Now capture aerial photos and video of your daily adventures effortlessly- and do it in stunning 4K Ultra High Definition. Simply take Breeze out of the box and let it fly.

Complex shots made easy

Use one of the flying camera's five automated flight modes to capture unique shots. Use Selfie and Orbit modes to take dramatic aerial group photos and video or use Follow Me mode to grab compelling aerial footage of your action sports adventures. The shots that previously would have required a skilled pilot are now accessible with the click of a button. Live in the moment and let Breeze do the work.

Breeze Cam App

Use the Breeze Cam app to manually fly the drone, use automated flight modes and edit photos. Share your photos and videos instantly to your favorite social media such as: Facebook, Twitter, and Instagram.

Superior image quality

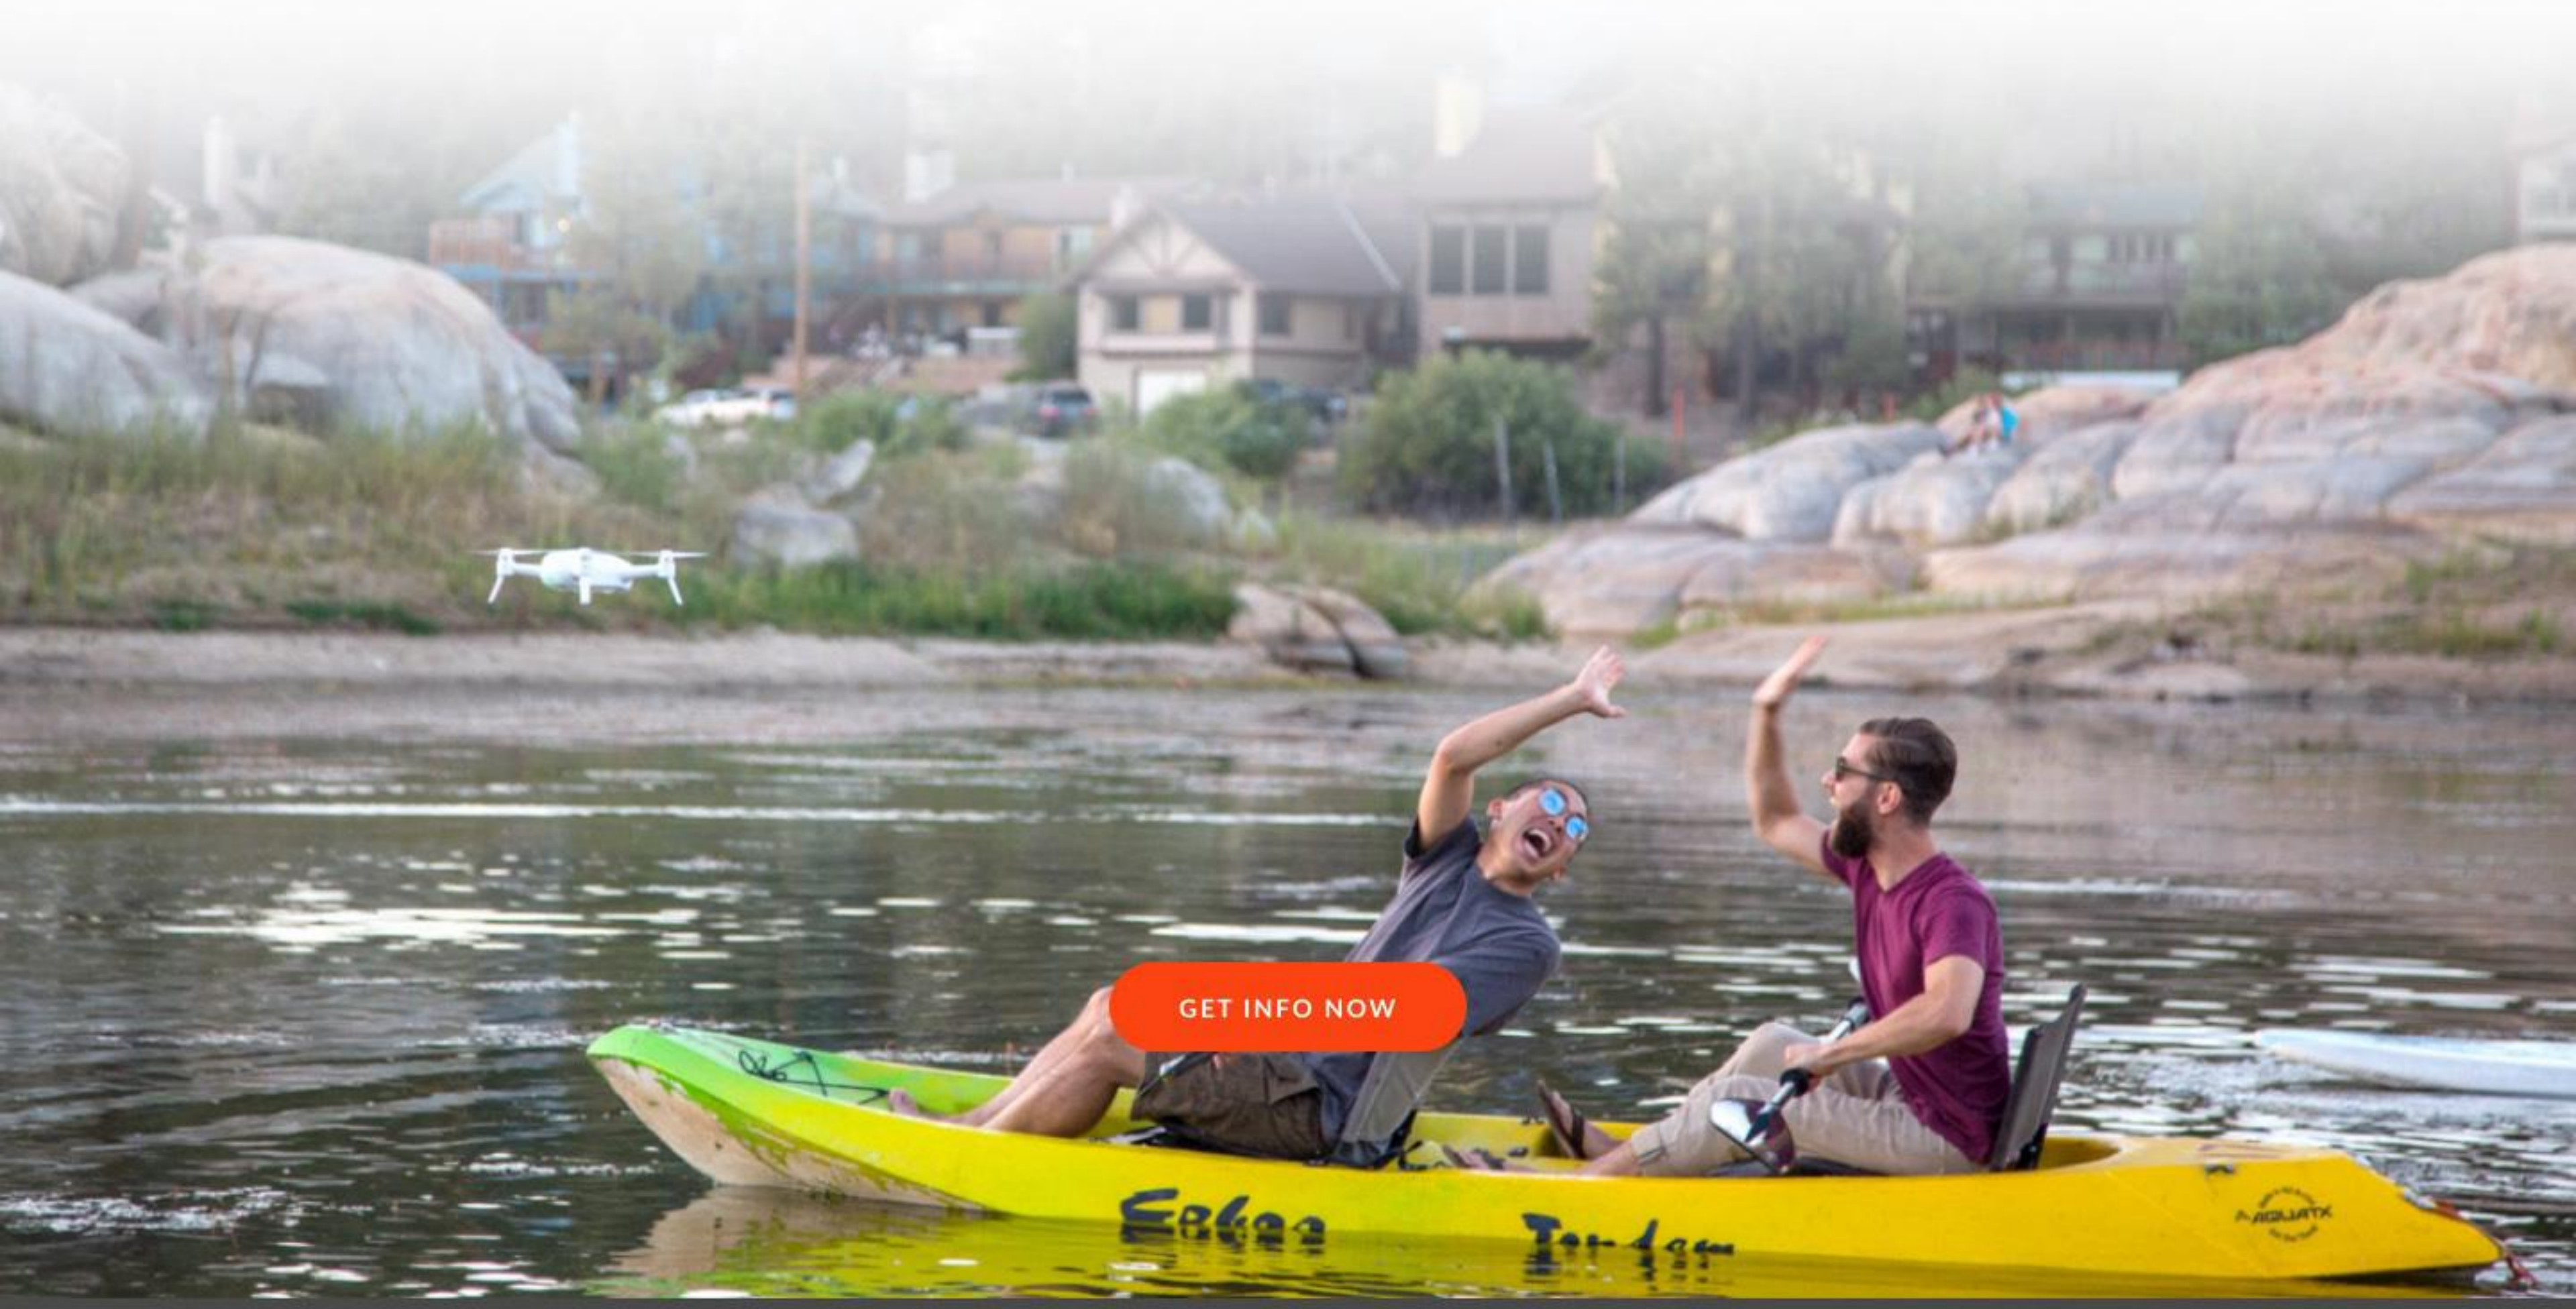

Featuring breathtaking 4K Ultra High Definition and ultra-clear 13 megapixel stills, Breeze is just as capable as drones twice its size. Enjoy a live 720 HD live stream of your flight on your smart device.
